Professional Transcription Services

Voice recognition typing software is often used as a quick and cheap alternative to professional transcription services. However, there can be a few pitfalls of using speech recognition software.

For medical transcription, voice recognition may not pick up jargon such as drug names and instructions. Let's try Lamotrigine 25mg BD.

Voice recognition software may also be confused by coughing, over speaking or mumbling or other vocalisations, such as may occur in a focus group transcription. So let's try it. Over speaking, a cough and a whisper.

Grammar and punctuation mistakes may also occur, as well as errors in spelling of names or places. So let's try it. So Neil deGrasse Tyson said "The good thing about science is that it's true whether or not you believe in it."

Voice Recognition Transcript with Key

Red – Typing Error

Blue – Failed to Type

Voice recognition typing software is often used as a quick and cheap alternative to professional transcription services. However, they can be a few pitfalls of using speech recognition software.

For medical Transcription, voice recognition may not pick up jargon such as drug names and instructions.

Let's try much again 25 mg a day.

But recognition software may also be confused by coughing either speaking or mumbling or other vocalisations such as may occur in a focus group transcription. So let's try it thinking, has any client with.

Grammar And punctuation mistakes may also occur, as well as errors in spelling all place names. So let's try it. So gig left Tyson said the good thing about science is that it's true whether or not you believe in it.
